Alice Schenk	Portola Valley	2/23/2022	<p>Please approve azek material for decks. To make it really expensive and difficult to replace old decks just encourages the retention of wooden decks so it makes sense to facilitate the replacement, not discourage it. This is a logical conclusion.</p> <p>Please consider adding “non-combustible or non-flammable” for deck choices. Otherwise, the replacement of decks is cost-prohibitive.</p>
Cindy Labuda	Portola Valley	2/23/2022	<p>Fire hardening steps should be sensible and perfect should not be the enemy of the good. Prohibitive costs associated w the most drastic potential revisions to ordinances will not help homeowners that want to remodel and do things to help.</p>
Josh Knowles	Portola Valley	2/23/2022	<p>I am supportive of Kate O'Hanlan's request that Azek material be allowed for decking and related purposes in Portola Valley. Allowing homeowners to update materials to non-flammable, class A fire-retardant materials is in the best interests of the town (more homeowners will replace structures that are higher risk) and homeowners (improved fire safety for them and their neighbors).</p>
Crystal Ciancutti	Portola Valley	2/23/2022
