By virtue of the foregoing definition, a basement is permitted to meet the minimum requirements of the building code, including, but not limited to, light, ventilation and access, without approval of the architectural and site control commission.

  - (2) On a lot that is not split pursuant to California Government Code Section 66411.7 and Chapter 17.13 (SB 9 Lot Splits) and for which an existing primary dwelling unit does not exist or is demolished or reconstructed: two new primary residential dwelling units, one accessory dwelling unit, and one junior accessory dwelling unit, for four units in total.

Such SB 9 units may consist of existing units, but in no event may the number of units exceed two units per lot for a maximum of four total. In lieu of two new primary residential dwelling units, an applicant may propose one new primary residential dwelling unit together with either a new accessory dwelling unit or a new junior accessory dwelling unit, provided that the applicant submits a written statement with the application for the housing development project indicating the applicant's understanding that providing the accessory dwelling unit or junior accessory dwelling unit will prevent the applicant from constructing a second primary residential dwelling unit in the future.

It is the intent of this provision that not more than four units may be constructed per original lot.

- (b) Floor Area. The maximum floor area of an SB 9 unit shall be:
- (1) Eight hundred and fifty square feet for SB 9 units with up to one bedroom or one thousand square feet for SB 9 units with more than one bedroom where the SB 9 unit does not comply with the setbacks of the base zoning district and special setbacks applicable to the parcel.

The parcel owner utilizing this incentive shall record a deed restriction in a form approved by the town attorney stipulating that no further subdivision of the parcel is permitted.
  - (4) Any development or design standards that physically precludes an SB 9 dwelling unit from being eight hundred square feet in floor area shall be waived or modified by the planning and building director upon applicant's submittal of a feasibility study demonstrating that application of such standard does not allow for an eight hundred square foot SB 9 unit. This shall not include standards which would result in adverse impacts to public health or safety or the physical environment.
  - (5) Any applicant desiring to build more than the maximum size specified in this section shall be subject to the town's regular zoning and design review process.

Basements located under an SB 9 unit that do not have internal access to the SB 9 unit are discouraged and shall be counted towards AMFA calculations.

TABLE 4—PARKING LOT DIMENSIONS

Width of stall.....9'

Length of stall.....18'\*

Width of aisle.....25'

\*Up to two feet of overhang may be deducted from required stall length if the overhang does not interfere with planting, walks or other site features and is approved by the architectural and site control commission.

The foregoing standards are for ninety-degree parking and an aisle for two-way traffic. Parking at other angles shall provide for similar geometric standards as approved by the town engineer. (Ord. 1987-223 § 1, 1987; Ord. 1979-166 § 16 (part), 1979; Ord. 1967-80 § 1 (6210.1 (A)), 1967)

#### 18.60.030 Location and type.

Off-street parking facilities shall be located as specified in this section. Where a distance is specified, the distance shall be the walking distance measured from the nearest point of the parking facility to the nearest entrance of the building that the facility is required to serve.

- A. In residential districts, required parking facilities, except required guest parking spaces, shall be in a carport or garage and all spaces shall be located on the same parcel or building site as the buildings they are required to serve unless otherwise authorized by conditional use permit, [otherwise regulated by the Opt-in Housing Diversification Program established by the Portola Valley Housing Element](#), ~~or otherwise allowed by State law.~~
- B. For uses in other districts, parking spaces may be located on separate sites provided they are not over two hundred fifty feet from the buildings they are required to serve.

- 
- C. When the required off-street parking facilities are not situated on the same parcel as the use they are required to serve, there shall be recorded a covenant as required for joint use under paragraph D (3) of Section 18.60.070.
  - D. In R-1/7.5M, 15M and 20M zoning districts, where the ASCC finds there is no reasonable location for a second required covered parking space that would have direct unobstructed vehicular access, such required parking space may be uncovered and/or in tandem, provided that in the case of an uncovered space, two hundred square feet shall be considered as floor area for purposes of determining compliance with the floor area limitations on a parcel. On parcels of twenty thousand square feet or less, an uncovered parking space may occupy required yard areas upon approval by the ASCC and after notification to affected neighbors.

(Ord. 1967-80 § 1 (6210.1 (B)), 1967; Ord. 2001-338 § 7 (part), 2001)

#### **18.60.040 Determination of parking facility requirements—Units of measurement.**

- B. ~~In indoor or outdoor places of assembly in which patrons or spectators occupy benches, pews, or other similar seating facilities, each twenty inches of such seating facility shall be counted as one seat for the purpose of determining requirements for off-street parking facilities.~~
- C. When units of measurements determining number of required parking spaces result in requirement of a fractional space, any fraction up to and including one-half shall be disregarded and fractions over one-half shall require one parking space.

(Ord. 1967-80 § 1 (6210.1 (C)), 1967)

#### **18.60.050 Determination of parking facility requirements—Changes in use—Additions and enlargement.**

Whenever on any parcel there is a change in use, or increase in floor area, or in the number of employees or other unit of measurement specified in this chapter to indicate the number of required off-street parking spaces and such change or increase creates a need for an increase of more than ten percent in the number of off-street parking spaces, as determined by the tables in this chapter, additional off-street parking spaces shall be provided on the basis of the increased requirements of the new use, or on the basis of the total increase in floor area, or in the number of employees, or in other unit of measurement. The effects of additions, enlargements, and changes in use subsequent to July 18, 1967, shall be cumulative in regard to off-street parking requirements.

(Ord. 1967-80 § 1 (6210.1 (D)), 1967)

#### **18.60.060 Determination of parking facility requirements—Mixed occupancies and uses not specified.**

In the case of a use not specifically mentioned in Section 18.60.110, the requirements for off-street parking facilities for a use which is so mentioned and to which the use is similar, shall apply as determined by the planning commission. In the case of mixed uses, the total requirements for off-street parking facilities shall be the sum of the requirements for the various uses computed separately. Off-street parking facilities for one use shall not be

---

considered as providing required parking facilities for any other use except as specified in Section 18.60.070 for joint use.

(Ord. 1967-80 § 1 (6210.1 (E)), 1967)

- B. Up to one hundred percent of the parking facilities required by this section for a church or for an auditorium incidental to a public or parochial school may be supplied by parking facilities of a use considered to be primarily a daytime use, provided such reciprocal parking area shall be subject to conditions set forth in subsection D of this section.
- C. The following uses are typical daytime uses: banks, business offices, retail stores, personal service shops, clothing or shoe repair or service shops, and similar uses.
